Feedback:

I cannot recommend All American Air and Electric highly enough. They have serviced my rental properties exclusively for both electrical and AC work since 2023, and they have consistently delivered outstanding service, quality workmanship, and fair pricing. They have handled everything from post-flood repairs on two separate occasions to a new AC system installation, duct work, electrical box upgrades, new switches, new wiring, outlet replacements, and much more. No matter the size or urgency of the job, their team has been professional, reliable, responsive, and thorough. It is a huge relief to have one trusted company I can count on for both electrical and AC needs across my properties. Their work has been excellent, their communication is strong, and their pricing is very reasonable for the level of service they provide. I highly recommend All American Air and Electric to anyone looking for dependable, high-quality electrical or HVAC service.
